Copyright transfers

Many authors have strict regulations in their contract of employment regarding their works. A transfer of copyright to the institution or company is usual, as well as the reservation of specific usage rights, is typical. Please note that in the case of abstract publication with the Creative Commons License, a transfer of the copyright to the institution is possible, as it belongs to the author anyway.

Any usage rights are regulated through the Creative Commons License. Anyone (the author, his/her institution/company, the SGAR, as well as the public) is free to copy, distribute, transmit, and adapt the work as long as the original author is given credit (see above). Therefore, specific usage rights cannot be reserved by the author or his/her institution/company, and **the publisher cannot include a statement "all rights reserved" in any published abstract.**

A copyright transfer from the author to his/her institution/company will be expressed in a special "Copyright Statement" at the end of the abstract rather than in the abstract citation header. Authors are asked to include the following sentence: **"The author's copyright for this abstract is transferred to institution/company".**

Yet, even in this conditions, SGAR has the permission to use (publish and distribute) the abstract/full paper/ poster/presentation for the event you submitted for. You grant SGAR the right to place the abstract/full paper/ poster/presentation on a USB stick, CD, website or other medium that may be shown or handed out to the participants of the event and the contributing parties.
